absurdum est manifestum est ergo
quod similitudo non fit propter decisionem
spermatis a toto corpore sed propter [illegible]
causam quam nos in animalibus vi-
demus assignamus Si enim dicatur
sperma decindi a singulis membris [illegible]
bus ex quo membra similia sunt compo-
sitionis sunt autem officialia eo quod
compositio ipsorum est in facie et ma-
nibus tunc debet natus in ore semper
parenti assimilari ita quod similis est
in facie et in unguibus et aliis parti-
bus similibus Si autem dicatur quod sperma
exit ex utrisque membris tunc quare [illegible]
[illegible] quis sit modus generationis [illegible]
nos enim videmus officialia [illegible]
composita ex similibus Sic ergo sperma [illegible]
ab utrisque partibus est decindi a si[illegible]
et postea ab officialibus quibus [illegible]
dignius est ut exeat ex primis [illegible]
tibus quam ex compositis quod compositum non
fit nisi ex composito simplicium Sic
si diceremus [illegible] at [illegible] nominis et [illegible]
est quod exeat ex sillabis quae sunt partes
nominis et orationis et similiter quod ex
ita a sillabis est quod exeat ex litteris
elementis Sic ergo si dicatur quod sper-
ma exit a toto corpore est quod exeat
a membris [illegible] et [illegible] similibus et
si exit ex illis est quod exeat a prin-
cipiis [illegible] debe-
bit ex elementis propter exitum
eius ex illis non [illegible] quod sit aliqua
similitudo generanti ad genitum ergo
per similitudinem [illegible] et ad parentes
non probatur sperma exire a toto
corpore [illegible] quod plures [illegible]
contingit ex causa [illegible]
[illegible] a toto corpore sicut [illegible]
Empedocles et Anaxagoras [illegible]

Sunt autem [illegible]
opiniones [illegible] sper-
ma a toto corpore generatum
decindi Empedoclis videlicet et
Anaxagore de quibus est mentio

dicebat enim Empedocles [illegible] sper-
ma decindi a toto corpore [illegible]
[illegible] similia [illegible]
[illegible] formata [illegible]
[illegible] causa [illegible] sperma [illegible]
[illegible] capita utriusque remanent
[illegible] duas civitates non [illegible]
[illegible] enim est de illis quae [illegible]
oriunda esse montibus sive [illegible]
sive disiuncta lis aut et amicitia
disgregando et congregando quodlibet
unumquodque membrum ad id quod est
sibi congruum Anaxagoras
autem dicebat Et dividit unumquodque
ab eo quod est sibi congruum Anaxago-
ras autem dicebat sperma esse
decisum ex omnibus similibus [illegible]
et in ipso esse omnia similia actu sed
occulta [illegible] dicit carnem [illegible]
[illegible] carne visibili generantur
[illegible] ex sanguine et os ex
[illegible] sic de aliis et quod latent
in [illegible] ideo dicit intellectum
[illegible] et coniungere convenientia ab
inconvenientibus Sic ergo sic dicta
sunt sicut [illegible] esse in semine
aut sunt divisa [illegible] formata et
collecta Si autem [illegible] divisa non
possunt vivere [illegible] non enim
[illegible] videmus [illegible] et
si non vivunt tunc non [illegible]
[illegible] neque generatur ex ipso totum
vivum per ipsos Si autem in semine co-
formata sunt [illegible] tunc sper-
ma exit corpus organicum vi-
vum et tale est illud quod sperma est
[illegible] quod est absurdum Ampli-
us autem similiter se habent [illegible]
sperma [illegible] sic sperma mu-
lieris quodlibet cum spermate viri
Si enim utrumque [illegible] decinditur
a toto corpore femine et toto corpore
maris est quod natus ex spermate
in duobus membris [illegible]

Incipit liber ix de animalibus qui
est de principiis et origine genera-
tionis hominis. Tractatus primus
de origine que est ex parte ma-
turi spermatis. Capitulum primum
de signis pubertatis cum primo inci-
pit descendere semen ad inguina.

Reversi autem venientes ad prin-
cipium generationis hominis sic
sequimur primo simul de principio
generationis dicemusque eius tempus in mare
quam in muliere de principio eius et ultimo
sunt quia hoc est quando potest impregnari mulier
et impregnare vir et usque ad quanta eta-
tem perseverat. Similiter usque in eius dictis
et de omnibus aliis accidentibus generaliter
hominis generationem sive in se sive ex loco
et tempore et modo generationis accidunt.
Dupliciter autem iam quedam dicta sunt de
diversitate maris et femine et de valetate
membrorum pertinentium ad generationem quoniam
mas est generans in alio sive super ex
semine suo formante et distinguente
et secundum ... femina autem est generans
ex virtute seminis maris cum semine
suo tibus et ipsa est generanti et membra
generationis maris sunt semine matu-
rantia sicut testiculi et semine ad locum
matricis ipsum effundentia sicut virga.
Membra autem generationis mulieris sunt
quedam sugentia semen sicut vulva
et matrix et membra continentia ad cibum
advenientia sicut testiculi mulieris et ve-
ne sive orificia sanguinem ministran-
tes matrici et ipsa vulva matrix quando
applicata super semen fovet ipsum do-
nec applicatur. Incipientes ergo de-
de hiis primo tractare dicemus quod prin-
cipium temporis ex quo potest generare ut
in pluribus est post complementum duo-
rum septenniorum et huius signum est quod in
hoc tempore incipiunt pili oriri pectinis
qui sunt circa pudenda et talis incre-
mentum illius augmentatur et tunc incipit
etiam sperma exire ab homine et hoc est
sicut videmus in arboribus quod quando debent
gerere semina apparent etiam loca in

semina et flores. Et in hoc tempore puer in
homine etiam viridia sic dixit vir p-
alcarmenos chormaciensis et in isto etiam
tempore incipit mutari vox in gravitatem et
efficitur tunc vox inequalis vel asperitate
deformis ita quod neque acuta est sicut
vox pueri neque gravis sicut vox viri et
et hoc precipue signum est in hiis qui
illo tempore utuntur coitu quia annuis concu-
tiunt venas cavernam sive arteriam
vocalem. Ideo tunc est vox eorum sicut
sonus cithare duarum cordarum quarum
una magis est tensa et altera est magis
laxa sive quod una sit declinans ad
mollitiem et altera faciat quasi sonum
gravem et vox sonum interruptum sicut est
vox caprarum. Causa autem est quod in ista tantum
etiam et in musculis compositis et
in ipso composito est principium ma-
turationis et est ante maturationis
perfectionem et ideo sunt quedam partes
mature et quedam immature quedam
semini destitute per hoc quod descendit
in formatione quedam autem ... illo ...
sunt in ... et tunc ille partes sunt or-
gana vocalia ... quod in ... sit
consonantie partes ille et voce faciunt
non armonicam et inequalem quasi sit
interruptam. Hoc accidit tamen invenit
magis in hiis qui incipiunt uti coitu
et ideo qui volunt diu servare voces
suas abstinent se a coitu aut et ...
mutilant. Hoc etiam tempore elevantur
... mamillis quoniam humor men-
struus ascendit sursum et incipiunt
intumescere poma mamillarum propter
... venas que
est inter mamillas et matricem ...
... intumescunt quousque ...
suo pondere cadat et tunc ... fi-
unt mamme dependentes plene
quidem et tumentes in pregnantibus
laxe autem et vacue in non pregnantibus
eo quod in pregnantibus clausa matrice
per sanguis menstruus in mamillas
... et fit lac ... ut intumescunt
impletis mammis ... apta

mr ex eo descendit in menstruis et io
lam et parua efficiatur citra mamilla
accidit et etiam mutatio in ymmi tam
in mamillis quam in feminis quam in mare
b q non solum mutatur quantitas uerum

etiam illo tempore frequenter esse titil
lationes in capite ventris que debeat

fricationem humor attrahitur et non
emittit et cum humore attrahitur ca
lor et cum mulieris corpore sit frigidum
et clausura pariens porum non tunc

Si ita quod paciatur natus post mensem x. dico quod mulieres erraverunt in computatione prime impregnationis eius. Autem vidi puerperam honestam et fide dignam cum tu mirarer quantitatem pueri que protulit quod enormis erat quantitatis asseruit constanter quod natum x mensibus in utero gestaverat. Error enim sepe accidit in computatione mulierum ex multis causis quarum una est quod tempore vel alia causa accidit in muliere tumor ventositatis aliquam et credunt se tunc concepisse vel ab alio tempore computant et post eam per aliquos dies coeunt et vere concipiunt et tunc quod computata primo per ventris tumore decipiuntur. Enim mulier recipit sperma viri et illi spermati non coniungitur sperma ipsius tunc est vanum sperma viri et illud convertit in ventositatem levat matricem et forte vapor eius ascendit caput et inducit phlegmone et etiam corpulentia et in elevatione matricis decipiuntur femine credentes se concepisse tunc non conceperunt. Similiter aliquando

mulier accidit, tunc vero quando autem non emittit semen aut valde tarde propter solitam frigiditatem coitus emittit tunc et in illo coitu mulier emittit sperma ipsius intra matricem ipsius et non sperma viri et claudit matrix se super sperma ipsius et tunc etiam illud semen est inutile et convertitur in vaporem ventositatis et elevat matricem et facit apostemata et similitudinem conceptionis et sic post eam mulier vere recipit ex alio coitu viri facit errorem in computando alia etiam quod claudunt matricem et abscondunt mestruum aliquando errorem sed non sic eam quod dicta sunt.

generationis que est pot. generandi est
in matrice et quando primum potest recipere sperma
et principium generationis est in secunda
hoc est quando habet potentiam concipiendi
quando primum emittit menstruum. Sed tamen
in isto tempore non statim pariunt immo
dicunt et quos generant sunt minde-
biles non consentes producere qua
nevite. Jam autem supra diximus quod
etates sunt convenientes tam in mare
quam in femina ad perfectum principium ge-
nerationis. [illegible]
[illegible]
[illegible]

Menstruum autem
cessat in pluribus mulieribus
circa xlv annos et in quibusdam
habetur usque ad l annos et tunc
desinit fieri mulier vetula et cessat
potentia generandi. In viris autem plu-
ribus efficitur est semen usque ad lxx
annos et in quibusdam paucis usque
ad lxxx et tunc desinit in viris po-
tentia generandi. Visum fuit enim quen-
dam virum genuisse in lxx annis.
Contingit etiam aliquando quod vir aliquis
et mulier aliqua non generant insimul et
tamen dicunt cum alio viro generat
ex alio viro et ille non cum ea sed cum alia
muliere, et hoc contingit ex mul-
tis causis quarum una est quod femina
eorum non sunt proportionata et forte
unum corrumpit reliquum sed contingit
hoc quod membra generationis non sunt
proportionata et non suscipit semen
in loco unde attrahi potest sed contin-
git et quod vir et mulier semper inequa-
liter emittunt sicut si vir velocius
est emissione et mulier propter tarde aut
econverso et plures tales possunt esse cause
propter quas lex romana fuit quam summus
iudex confirmavit, ut si quando uxor
non fecundata a viro inveniret alium
et hoc licentia maritali ad tempus
separata fuit a ratione et nupsit
alii et cum nec ab illo suscipit con-

ceptum redeunt ad rationem amplius.
Plurime autem a cantu virorum quorum
sperma est calidum et spissum plures ma-
res filios et nullas aut paucissimas
filias ex aliquibus mulieribus et econ-
tra quecumque generant ex aliquibus
mulieribus plures feminas absque fi-
liis quorum sperma apparitas habet
equalitate et tamen separantur ab illis
mulieribus aut non generant prius et
huius causa est impotentia. Adhuc aliquando
quidem vir ex aliqua muliere generat
in una etate aliquem sexum et masculi
aut etate altera sexum alium sicut in
iuventute forte filios et in senec-
tute filias aut econverso propter dispositionem spe-
cialem ex etate mutatas quod natura
expedit. Adhuc quidem homines
non generant in iuventute et postea
incipiunt generare et quidam faciunt
econverso et primi quidem sunt excellenter
calidi et sicci quorum qualitates cum tempe-
rate fuerint beneficio etatis temperabitur
sperma et accipiet virtutem generandi
alii autem opposito modo sunt dispositi.
Amplius autem quedam mulieres raro et diffi-
culter recipiunt semen et tamen recipiunt
cito reiciunt et quedam impregnantur
de facili et retinent semen concep-
tum et huius causa sunt plurime quarum
una debilis est matrix et forte minus
movetur matrix in delectatione
coitus aut forte infusa humore aliquo
aliqua est huius causa. Adhuc aliqui
coniuges coniuncti non generant nisi
mares et aliqui non generant nisi
feminas sicut communiter narrant de viro
qui vocabatur [illegible] qui
ex pluribus uxoribus sibi coniunctis ge-
nuit lxx filios inter quos non fuit
nisi una sola filia. Accidit etiam plu-
ribus viris in primo in iuventute
magnam potentiam generandi et postea
omnino deficere et non generare et inter
eos aliquo tempore redit ad primam ge-
nerandi potentiam et hoc non fit

interesse in emissione s(per)matis et
dispone embrionis in matrice.

In multis enim hominibus et aliis animalibus cum exitu spermatis prodit quedam ventositas exiens que resolvitur ex ipso semine et signum huius est quia emittitur ventositas cum emittitur sperma sicut vomitando eicitur. Sic habent quidam qui sunt retinentes cibum et tamen non ingrediuntur spiritum. Dum sperma actione est intus clausa ventositas et ideo emittentes eius sunt similes quia ventositas primo eicit patientem una et postea altera et est quasi vomitus impulsus ex in eius quod vomit et sicut una illarum vomitationum est inter delectationum in coitu. Adhuc considerandum est quod quando sperma durabit in matrice tempore longa et impregnat continet ipsum tela quedam sperma enim cadens in matricem antequam figuretur simile est humiditati dum in tela continente et textura ex fluxibus tunc tela exterior augmentatur apparet filosum ac si esset plenum venis quibusdam. Omnia autem animalia sive sint volatilia sive gressibilia ovantia per illum modum et humiditate in tela existente generant. Sed animalia que ex utero generant animalia sibi similia habent umbilicum adherentem matrici sicut declarabimus infra et per illum fugunt a matrice quando moti matricis et testa ejicitur. Quedam autem habent utroque istorum modorum umbilicum sicut habent genera piscium que intus ovant et extra pariunt. Adhuc de animalium eorum quod formatur in matrice quedam sunt in tela quadam et quedam in secundina et vocant telam simpliciter pelle. Secundina autem est que cum venis et arteriis continuatur ex matrice ad umbilicum et sic per umbilicum embrionem [?] intimetur ex corpore matris et quod secundina vocatur [?] que [?] pellis embrionis ad quam continuatur textura nervorum et venarum embrionis. Alii non primo fit in secundina et ex secunda secundina eius continet quam [?] et pariens

[?] est illius tele continuatur et ab hac recedit interius per concavitates residuum aliquam in uoluunt embrionem est separatum a matrice inter tela aliqua et secundina est humiditas aquosa que resudat ex fetu et ex recorda vrine venit sicut inferius declarabimus et hac humiditate obstetrices vocant grece stalsaron. Omnia autem animalia habentia umbilicum cibatur per ipsum et si matrix habuit concavitates venarum et arteriarum erit umbilicus adherens vel sic sicut continuus cum ipsis. Si autem levis est matrix plane superficiei mentissecus tunc umbilicus continuabitur superficiei matricis et sugit ex ipsa. Adhuc autem omne animal quadrupes positum extensum matrice per matricis longitudinem. Animal autem carens pedibus iacet in matrice super latus suum sicut est videre in delfino et ceto et aliis piscibus ex utero se filia generantibus. Animal autem bipes stat in matrice incurvatum sicut aves stat in ovo et homo in matrice ~~incurvatum~~ sed non incurvata stant in matrice ita quod nasus hominis est inter genua sua et oculi eorum inter genua sua et aves etiam genua sua sed tamen melius distinguemus in sequentibus istius libri. Adhuc autem etiam animalia sive quadrupedia sive bipedia sive pedibus carentia primo ante completa etate continentes tenere capita sua superius in matrice et cum completa fuerit et instat tempus partus tunc vertunt per se ipsa capita inferius ad exitum preparantia eo quod partus naturalis est hoc modo quod caput primo exeat de vulva. Amplius autem in naturis quorundam quadrupedum postquam completi sunt ad exitum ex utero inveniuntur superfluitates in stercore sed quod vocat monocolum et quedam inveniuntur multis intestinis quod elongatione superius in anteriori appellamus et tamen huius est in
